- 10) The force exerted when one object comes in contact with one another.

II. Fill in the blanks. (10)

- 1) _____ will only exist when two bodies interact with each other.
- 2) Friction can be both a friend and a _____.
- 3) _____ surfaces such as ice and glass have less friction.
- 4) Friction comes into play whenever there is _____.
- 5) Some vehicles, such as aeroplanes, have _____ bodies which help them to move at a very high speed and reduce the effects of _____.
- 6) The force with which a magnet attracts certain materials, such as iron, _____ and _____, is called magnetic force.
- 7) Football players have _____ on shoes.
- 8) The swimsuit of the swimmers _____ the shark's smooth skin.

III. State true or false. (5)

- 1) Friction can cause noise in machines. _____
- 2) The force of the Earth that pulls objects towards itself is called magnetic force. _____
- 3) A magnet attracts plastic. _____
- 4) Friction is a non-contact force. _____
- 5) Grease can be used to reduce friction in machines. _____

IV. Define the following. (Any two) (2.5 *2=5)

- (a) Muscular force (b) Contact force (c) Force (d) Gravitational force

V. Answer the following questions. (10*3=30)

- 1) How many types of forces are there? Name them.
- 2) What a force can do?
- 3) Name any two substances that can help you to reduce friction. Where are they helpful?
- 4) What do you mean by 'wear and tear'?

- 5) What is muscular force?
- 6) Write any three uses of friction.
- 7) How can you reduce friction? Explain.
- 8) Mention any three difficulties caused friction.
- 9) Differentiate between push and pull.
- 10) With the help of a diagram show magnet attracts iron nails due to magnetic force.
