Question 6**[15]**

Write a program to accept a number and check and display whether it is a Niven number or not. (Niven number is that number which is divisible by its sum of digits).

Example:

Consider the number 126.

Sum of its digits is $1 + 2 + 6 = 9$ and 126 is divisible by 9

Question 7**[15]**

Given below is a hypothetical table showing rates of Income Tax for male citizens below the age of 65 years:

Taxable Income (TI) in	Income Tax in
Does not exceed 1,60,000	Nil
Is greater than 1,60,000 and less than or equal to 5,00,000	$(TI - 1,60,000) * 10\%$
Is greater than 5,00,000 and less than or equal to 8,00,000	$[(TI - 5,00,000) * 20\%] + 34,000$
Is greater than 8,00,000	$[(TI - 8,00,000) * 30\%] + 94,000$

Write a program to input the age, gender (male or female) and Taxable Income of a person. If the age is more than 65 years or the gender is female, display “wrong category”.

If the age is less than or equal to 65 years and the gender is male, compute and display the Income Tax payable as per the table given above.

Question 8**[15]**

Write a program to accept a number and check whether a given number is twisted prime number or not.

A number is called a twisted prime number if it is a prime number and reverse of this number is also a prime number.

Examples: 11, 13, 17, 31, 37, 71, 73, 79

Question 9**[15]**

Write a Program in Java to find the sum of the series, taking the value of ‘a’ and ‘n’ from the user.

$$S = 1 + \frac{a^2}{1!} + \frac{a^3}{2!} + \frac{a^4}{3!} + \dots \text{to } n$$

(Where ! stands for factorial of the number and factorial value of a number is the product of all integers from 1 to that number, example $5! = 1 \times 2 \times 3 \times 4 \times 5 = 120$).

Q.4. A. Read the passages given below and answer the questions that follow them:

Adoption means establishing a bond between a couple (the adopters) and a child (the adoptee) which is legal, socially and morally equivalent to that between parents and their biological children. The adoptive couples assume the same rights and responsibilities in relation to the child as in a biological relationship and so does the adopted child towards his adoptive parents.

Adoption has been prevalent in India since ancient times. However, until the recent past, it has been mainly to fulfil the needs of the parents, i.e. to have a male child to perform the last rites or to acquire an heir to inherit the family name and property. Childless couples or those without a male child usually adopted a child from their own extended family or at least belonging to their own caste and community. The child's needs were secondary, although usually, a strong parent-child bond did develop.

Today, when a couple decides to adopt, the above reasons continue to be a major motivating factor. Almost equally potent is the desire to avoid the stigma attached to barrenness. However, more couples are now having reservations about adopting a child whose parents are known to them and are instead seeking children about whose background they may have little or no information. This is to avoid divided loyalties and possible interference in the care and upbringing of the child they adopt.

While India continues to have a high birth rate, there are also thousands of couples who are childless. In their desperation to become parents, they go from pillar to post and frequently spend thousands of rupees in trying out various methods like in vitro fertilisation, which still have a very low success rate. Many approach hospitals and private nursing homes and with the active assistance of medical and other staff, obtain unwanted children born therein, often clandestinely. Unfortunately, not many people seem to be aware of the existence of destitute children in institutions, languishing for want of a loving home, or that there are competent child welfare organisations which can help them to fulfil their desire for a child at the same time ensuring that their interests and those of the child are fully protected from all angles, including the important aspect of confidentiality. Details about such organisation are available with the State Department of Directorate of Social Welfare, and couples seriously considering adoption would do better to approach only such organisations rather than depending on the dubious and unreliable assistance of unauthorized persons in hospitals and nursing homes.

- What is adoption? (2)
- Till recent times, what was the primary reason for adopting a child in India? (2)
- Why are most couples reluctant to adopt children of parents known to them? (2)
- What do many childless couples do when they are desperate to have a child of their own? (two points) (2)
- Why is it better to adopt children only from competent and authorized institutions? (2)

B. In 60 words summarise the reasons why couples are keen on adopting a child in India and the measures they take to do so. Give a title to your précis and justify it. (8+2)
